The pNEUPOD NP-1 is a pneumatic isolation device developed by pNEUANCE Audio. This product uses air compression as its major isolation method. The pNEUPOD device effectively decouples (or isolates) the attached component from the platform on which it is sitting. The sonic improvements when isolating a preamp, power amp, DAC, disc player or audio server are quite profound. The pNEUPOD NP-1 proves to be a must for turntables and vacuum tube electronics. Go to [www.pneulance.com](http://www.pneulance.com) for complete information and your nearest dealer.
